

Assignment 3 Report: Aaron Fernandez  
#100967128

Many students and people in general struggle to keep track of tasks across many platforms. My webpage addresses the problem by offering a simple, centralized task management. Users can create tasks, track progress, edit and delete tasks that are no longer required. The tool's CRUD structure makes it both practical and intuitive.

Features:

- Create a new task (title, due date, and status).
- Edit or amend an existing task.
- Remove a task with confirmation.
- View all chores in a clean list.
